HATCO® CORPORATION NEWS RELEASE

Hatco Corporation's Hot/Cold Built-In Shelves Provide Versatile Innovation in One Unit

Milwaukee, WI (Jan. 4, 2016) – Give your foodservice operation the ultimate flexibility with Hatco® Corporation's innovative, patent-pending Hot/Cold Built-In Shelves.

Modeled after various Glo-Ray® Built-In Heated Shelves, the Hot/Cold Built-In Shelves – available in Aluminum Hardcoat or Swanstone® Decorative Stone offerings – easily change between a Heated Shelf and Cold Shelf to cater to different food products and day parts, transferring between the modes in approximately 30 minutes. The patent-pending thermal break mounting system significantly reduces temperature transfer and condensation from the shelf to the counter.

The Aluminum Hardcoat units are top mount, while the Swanstone models are bottom mounted, flush with the countertop. Both the control box and condensing unit can be mounted up to 4' away from the center of the shelf.

If your foodservice operation only serves pre-chilled foods, sturdy and foodsafe Cold Built-In Shelves are available, as well, to keep your food products in the perfect chill zone.

For additional information on Hatco's Hot/Cold Built-In Shelves and other products, contact your Hatco sales representative or visit the Hatco website at http://www.hatcocorp.com.

###

Hatco Corporation is a Milwaukee, Wisconsin-based, employee-owned company with a history of over 65 years of excellence in the quality design, production and servicing of holding and warming equipment. In 2009, Hatco introduced its Refrigerated Drop-In Well, bringing the same Hatco quality and excellence to the cooling side of its foodservice product line. Today, Hatco now has the versatile and innovative Drop-In Hot/Cold Wells and Hot/Cold Built-In Shelves, incorporating the legendary Hatco quality of warming and cooling into one unit.
