

HATCO® CORPORATION PRODUCT RELEASE

Glo-Ray® Curved Infrared Strip Heaters Combine Energy Efficiency with Sophistication

Hatco® Corporation's is introducing the Glo-Ray® Curved Infrared Strip Heater with LED Lights to its award-winning line of Strip Heaters. With a patented sleek, curved housing design, the Glo-Ray® Curved Strip Heater is the ideal solution for front-of-the-house applications. The GR5AL features warm LED lights and Hatco's signature pre-focused heat pattern to effectively blanket food holding areas to hold products at safe-serving temperatures. The energy efficient dual LED lights guarantee longer performance – compared to traditional incandescent, halogen and xenon bulbs – and have a 3050K temperature for more consistent warmth and improved light coverage. Optional dual colored LED lights allow for toggling between a warm white and neutral (cool) white to select the appropriate color temperature for enhanced food displays.
