

HATCO® CORPORATION PRODUCT RELEASE

Hatco's Rapide Cuisine® Countertop Induction Range Is Unlike Any Other Induction Range

Take induction cooking to a new level with Hatco® Corporation's Rapide Cuisine® Countertop Induction Range. With a contemporary, low-profile design, the Rapide Cuisine has a durable black ceramic glass top to handle the rigors of commercial foodservice use. The countertop range is operable in two modes, standard and advanced. In standard mode, the unit is used via power or temperature control. In advanced mode, operators can create preset programs for consistent cooking cycles. A USB port is standard for downloading system updates and adding modes. Using a Magnetic Power System (MPS) that delivers the highest power in its class, the IRNG-PC1 models also include an energy-saving automatic shut-off; Pan Sense Technology (PST) and compatible pan detection; and a high resolution color TFT display that shows precise power, temperature and timer settings.
