HATCO® CORPORATION NEWS RELEASE

Glo-Ray® Curved Strip Heaters Deliver Great Looks and Performance

Milwaukee, WI (Jan. 10, 2017) – The Glo-Ray® Curved Infrared Strip Heater from Hatco® Corporation is the perfect, stylish solution for front-of-the-house applications where heat is needed.

Featuring a patented housing design that is unobtrusive, this curved strip heater uses Hatco's signature pre-focused heat pattern to effectively blanket food holding areas to safely hold products at optimum serving temperatures without drying out or continuing to cook the food. The infrared element technology guarantees that the entire holding surface is evenly heated with no "cold spots."

The sleek housing of the GR5A is only 2" (51 mm) high and 6" (150 mm) deep, using a small footprint and allowing for greater visibility of the food below.

The Glo-Ray Curved Infrared Strip Heater is available in all of Hatco's *Designer* colors and Gloss finishes Gleaming Gold, Glossy Gray, Bold Black, Radiant Red and Brilliant Blue to match your décor. It is also available in both standard watt and high watt, and with energy-efficient dual LED lights.

For additional information on the Hatco Glo-Ray® Curved Infrared Strip Heater and other equipment, contact your Hatco sales representative or visit the Hatco website at <http://www.hatcocorp.com>.

###

From the corporate offices in Milwaukee to the state-of-the-art manufacturing facility in Sturgeon Bay, Wis., Hatco Corporation is a proud employee-owned company. Hatco has a history of over 65 years of excellence in the quality design, production and servicing of warming, toasting, holding, cooking and cooling equipment. Today, Hatco has introduced the versatile Hot/Cold Built-In Shelves and Rapide Cuisine® Induction Ranges into its extensive line of innovative foodservice equipment.
