## **HATCO® CORPORATION NEWS RELEASE**

### **For Consistent Uniform Toasting, Choose Toast-Qwik® Conveyor Toasters**

Milwaukee, WI (Apr. 20, 2018) – Hatco® Corporation's industry-leading Toast-Qwik® Conveyor Toasters have been redesigned with a modernized look, advanced controls and increased production capabilities, while still providing the best reliability, flexibility and value of any conveyor toaster around.

New to the Toast-Qwik line, except for the TQ3-10, is a touchscreen control panel that is easy to see and use, allowing implementation of up to 12 programmable product settings. A USB port is located on the front for easy software updates.

The TQ3 models use the patented ColorGuard Sensing System to monitor and adjust conveyor speed for consistent toast results, even during peak serving periods. A Power Save mode activates automatically after a certain period of time, or by pressing the power save button on the touchpad, to conserve energy. The TQ3-10 features an air intake filter screen while the other models feature a bottom screen, which are both removable for easy cleaning.

Most of the Toast-Qwik Conveyor Toaster line is available in Stainless Steel and *Designer Warm Red* (standard *Designer Black*) to match your décor; the TQ3-10 is available in only the *Designer Black*. A 2" (51 mm) opening is standard; models with a 3" (76 mm) opening are available for thicker bread products.

For additional information on the Hatco Toast-Qwik® Conveyor Toaster and other equipment, contact your Hatco sales representative or visit the Hatco website at <https://www.hatcocorp.com>.

###

From the corporate offices in Milwaukee to the state-of-the-art manufacturing facility in Sturgeon Bay, Wis., Hatco Corporation is a proud employee-owned company. Since 1950, Hatco has a history of excellence in the quality design, production and servicing of warming, toasting, holding, cooking, sanitizing and cooling equipment. Today, Hatco has introduced the versatile Hot/Cold Built-In Shelves and Rapide Cuisine® Induction Ranges into its extensive line of innovative foodservice equipment.
