## **HATCO® CORPORATION NEWS RELEASE**

### **High-Powered Rapide Cuisine® Delivers True Back-of-the-House Capability**

Milwaukee, WI (Aug. 1, 2017) – The Rapide Cuisine® High-Powered/Heavy-Duty Induction Range, offering industry-leading features with both countertop and built-in versions, is the latest addition to Hatco® Corporation's innovative line of induction ranges.

Exclusive to the IRNG-PC1-36 and IRNG-PB1-36 models are User Programmable Presets (UPP) for the operator to create preset programs for repeat menu items, as well as a food temperature probe and four (4) surface temperature sensors for more accurate cooking control.

The high-powered Rapide Cuisine can withstand high ambient kitchen temperatures up to 124°F (51°C), while an energy-saving automatic shut-off prevents overheating. A fully sealed top with conformal-coated boards adds extra protection against grease or moisture. Heavy gauge stainless steel housing, side impact protection and a scratch-hiding cooktop surface complete this commercial kitchen proof unit.

Standard features include: Pan Sense Technology (PST) to activate the unit only when a suitable pan is placed on top; Magnetic Power System (MPS) to provide the highest cooking power possible of any induction range available; a high resolution TFT display that instantly communicates precise power, temperature and timer settings; and a USB port for downloading system updates and adding new programmable Modes.

For additional information on the Hatco Rapide Cuisine® High-Powered/Heavy-Duty Induction Ranges and other equipment, contact your Hatco sales representative or visit the Hatco website at <http://www.hatcocorp.com>.

###

From the corporate offices in Milwaukee to the state-of-the-art manufacturing facility in Sturgeon Bay, Wis., Hatco Corporation is a proud employee-owned company. Since 1950, Hatco has a history of excellence in the quality design, production and servicing of warming, toasting, holding, cooking, sanitizing and cooling equipment. Today, Hatco has introduced the versatile Hot/Cold Built-In Shelves and Glo-Ray® Curved Infrared Strip Heaters into its extensive line of innovative foodservice equipment.
