

Maskerade™

Undercounter Induction Warmer

The best solutions hide in plain sight.

Hatco's patent-pending Maskerade™ Undercounter Induction Warmer offers a beautiful, flexible and simple solution for “invisible” hot food holding.

Model IWRM-UT-06.

- Can be mounted under a wide variety of materials including engineered **and natural stone** giving an “invisible” countertop appearance.
- Five settings, which allow for a wide variety of foods to be held both safely and at optimum quality.
- Highly slip resistant trivet keeps both the trivet and chafing dish in place and protects the stone from heat.
- For easy service, the main housing can be removed from the mounting brackets and dropped down in cassette form.
- Trivet works as a key. It has to be present to work, so it protects the stone and misplaced items such as laptops from sustaining damage.
